Intensive School

The Intensive School for external (off-campus) students will be held at UNE in room MC113 of the Mathematics and Computing Building (C26) from Thursday, 20th February to Saturday, 22nd February, 2014.

The Intensive School provides an overview of and preparation for the unit as well as an introduction to differential calculus. Some of the key concepts are highlighted and explained.

While attendance is not compulsory, we strongly recommend external students to attend. There is nothing as effective for the communication of mathematical concepts as being together in the same room. Moreover, getting to know each other in person make communication throughout the trimester easier. Students attending the Intensive School usually find it invaluable and typically do better in the unit.

You need to organise travel and accommodation yourself, but there is no need to register for the Intensive School. Just turn up with pen(cil) and paper, the unit material and an open mind.

Questions are very welcome and strongly encouraged.

The timetable is available via UNE’s timetabling website
